## React

A declarative, efficient, and flexible JavaScript library for building user interfaces.

Comment

Best JavaScript framework ever!

React, has completely changed the way I make web applications.

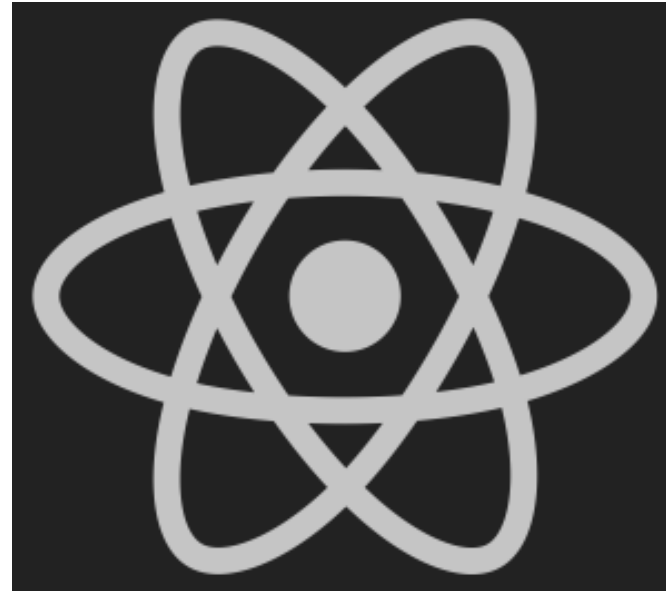

reply message 5 minutes ago

Works well with Atomic Design!

With React you can easily convert something designed with Atomic design to functional web code.

## React v16.86 — Patch

Recent

### React v16.86 — Patch

March 27, 2019

#### React

- Add Hooks — a way to use state and other React features without writing a class. (@acdlite et al. in #13968)
- Improve the useReducer Hook lazy initialization API. (@acdlite in #14723)

#### React DOM

- Bail out of rendering on identical values for useState and useReducer Hooks. (@acdlite in #14569)
